

# COMMUNITY HEALTH EDUCATION

Bachelor of Science

Ila Faye Miller School of Nursing & Health Professions

## Program Overview

The Bachelor of Science in Community Health Education (CHED) offered by the University of the Incarnate Word is designed to prepare individuals in the study and improvement of health promotion for different groups and communities. Community Health Educators are the frontline for gaining an understanding of community needs, including disease prevention and the promotion of healthy lifestyle practices. The program builds on the Ila Faye Miller School of Nursing and Health Professions and the University of the Incarnate Word's resources by adding an additional health professions entry opportunity at the undergraduate level.

## Professions School Opportunities

The degree provides graduates with a foundational health education that is appropriate for further graduate studies in Public Health. The degree responds to the need to prepare generalist community health educators with a curriculum that addresses the domains of the seven areas of responsibility set by the National Commission for Health Education Credentialing, Inc. (NCHEC). Students who graduate will be eligible to sit for the Certified Health Education Specialist (CHES) certification exam. The degree also provides graduates with a foundational health education that is appropriate for further graduate studies in Public Health.

## Career Opportunities

Community Health Educators serve as a liaison/link/intermediary between health/social services and the community to facilitate access to services and improve the quality and cultural competence of service delivery. Upon graduation, students who have successfully completed all of the course requirements will be prepared to provide health education in non-school health settings, such as public health departments, hospitals, work site health promotion, and non-profit community agencies. The field is rapidly expanding into new areas of health and community wellness as community health practitioners continue to improve chronic disease management programs, health insurance enrollment, immunization drives, HIV/AIDS treatment, access to mental health services and maternal-child health interventions.

## Special Programs

Entry to the Community Health Education major requires a completion of all pre-requisite courses with a minimum grade point average of 2.0
