**DENTAL PLAN**

**BENEFIT SHEET**

\*An expense is incurred, for purposes of this section, on the date a service is performed or a supply is furnished, with the following exceptions, for which the expense will be deemed to be incurred as described:

1. For an appliance or modification of an appliance, on the date the master impression is made;
2. For a crown, a bridge, or an inlay or onlay restoration, on the date the tooth is prepared; and
3. For root canal therapy, on the date the pulp chamber of the tooth is opened.

If a particular service is listed under more than one type, the expenses for that service will be covered only under the listing for which you receive the greatest benefit.

Because many dental problems can be resolved in more than one way, the Plan Administrator reserves the right to determine the dental procedure codes as it deems appropriate that will represent the lowest-cost treatment which adequately restores the mouth to normal form and function. The codes used are based on nationally established standards of the dental profession.
